

Sustainability

Important Index has Impact on **Vitality** and **Sustainability**

How effectively Companies channel human potential towards innovation

Repetitive / Innovative Work Time Ratio

 Global Employee Sentiment
Globally, **67% of employees** feel "crushed" by repetitive tasks.

 Time for Innovation
Only **20–30%** of time is spent on innovative or creative work.

 Productivity Drain
The remaining time – dedicated to routine, repeatable tasks – significantly drains productivity and morale.

Agentic AI: Shifting the Balance

Fundamentally shifts work — freeing people from repetition, amplifying innovation, and sustaining enterprise vitality

Sustainability

Important Index has impact on **Vitality**
and **Sustainability**

How effectively companies channel
human potential towards innovation

KEY PERFORMANCE INDICATOR

Repetitive /
Innovative
Work Time Ratio

Time for Innovation

Only 20–30%

of time is spent on innovative or creative work.

Global Employee Sentiment

67% of employees

feel "crushed" by repetitive tasks.

Productivity Drain

70-80%

Of the remaining time – dedicated to routine,
repeatable tasks – significantly drains productivity and morale.

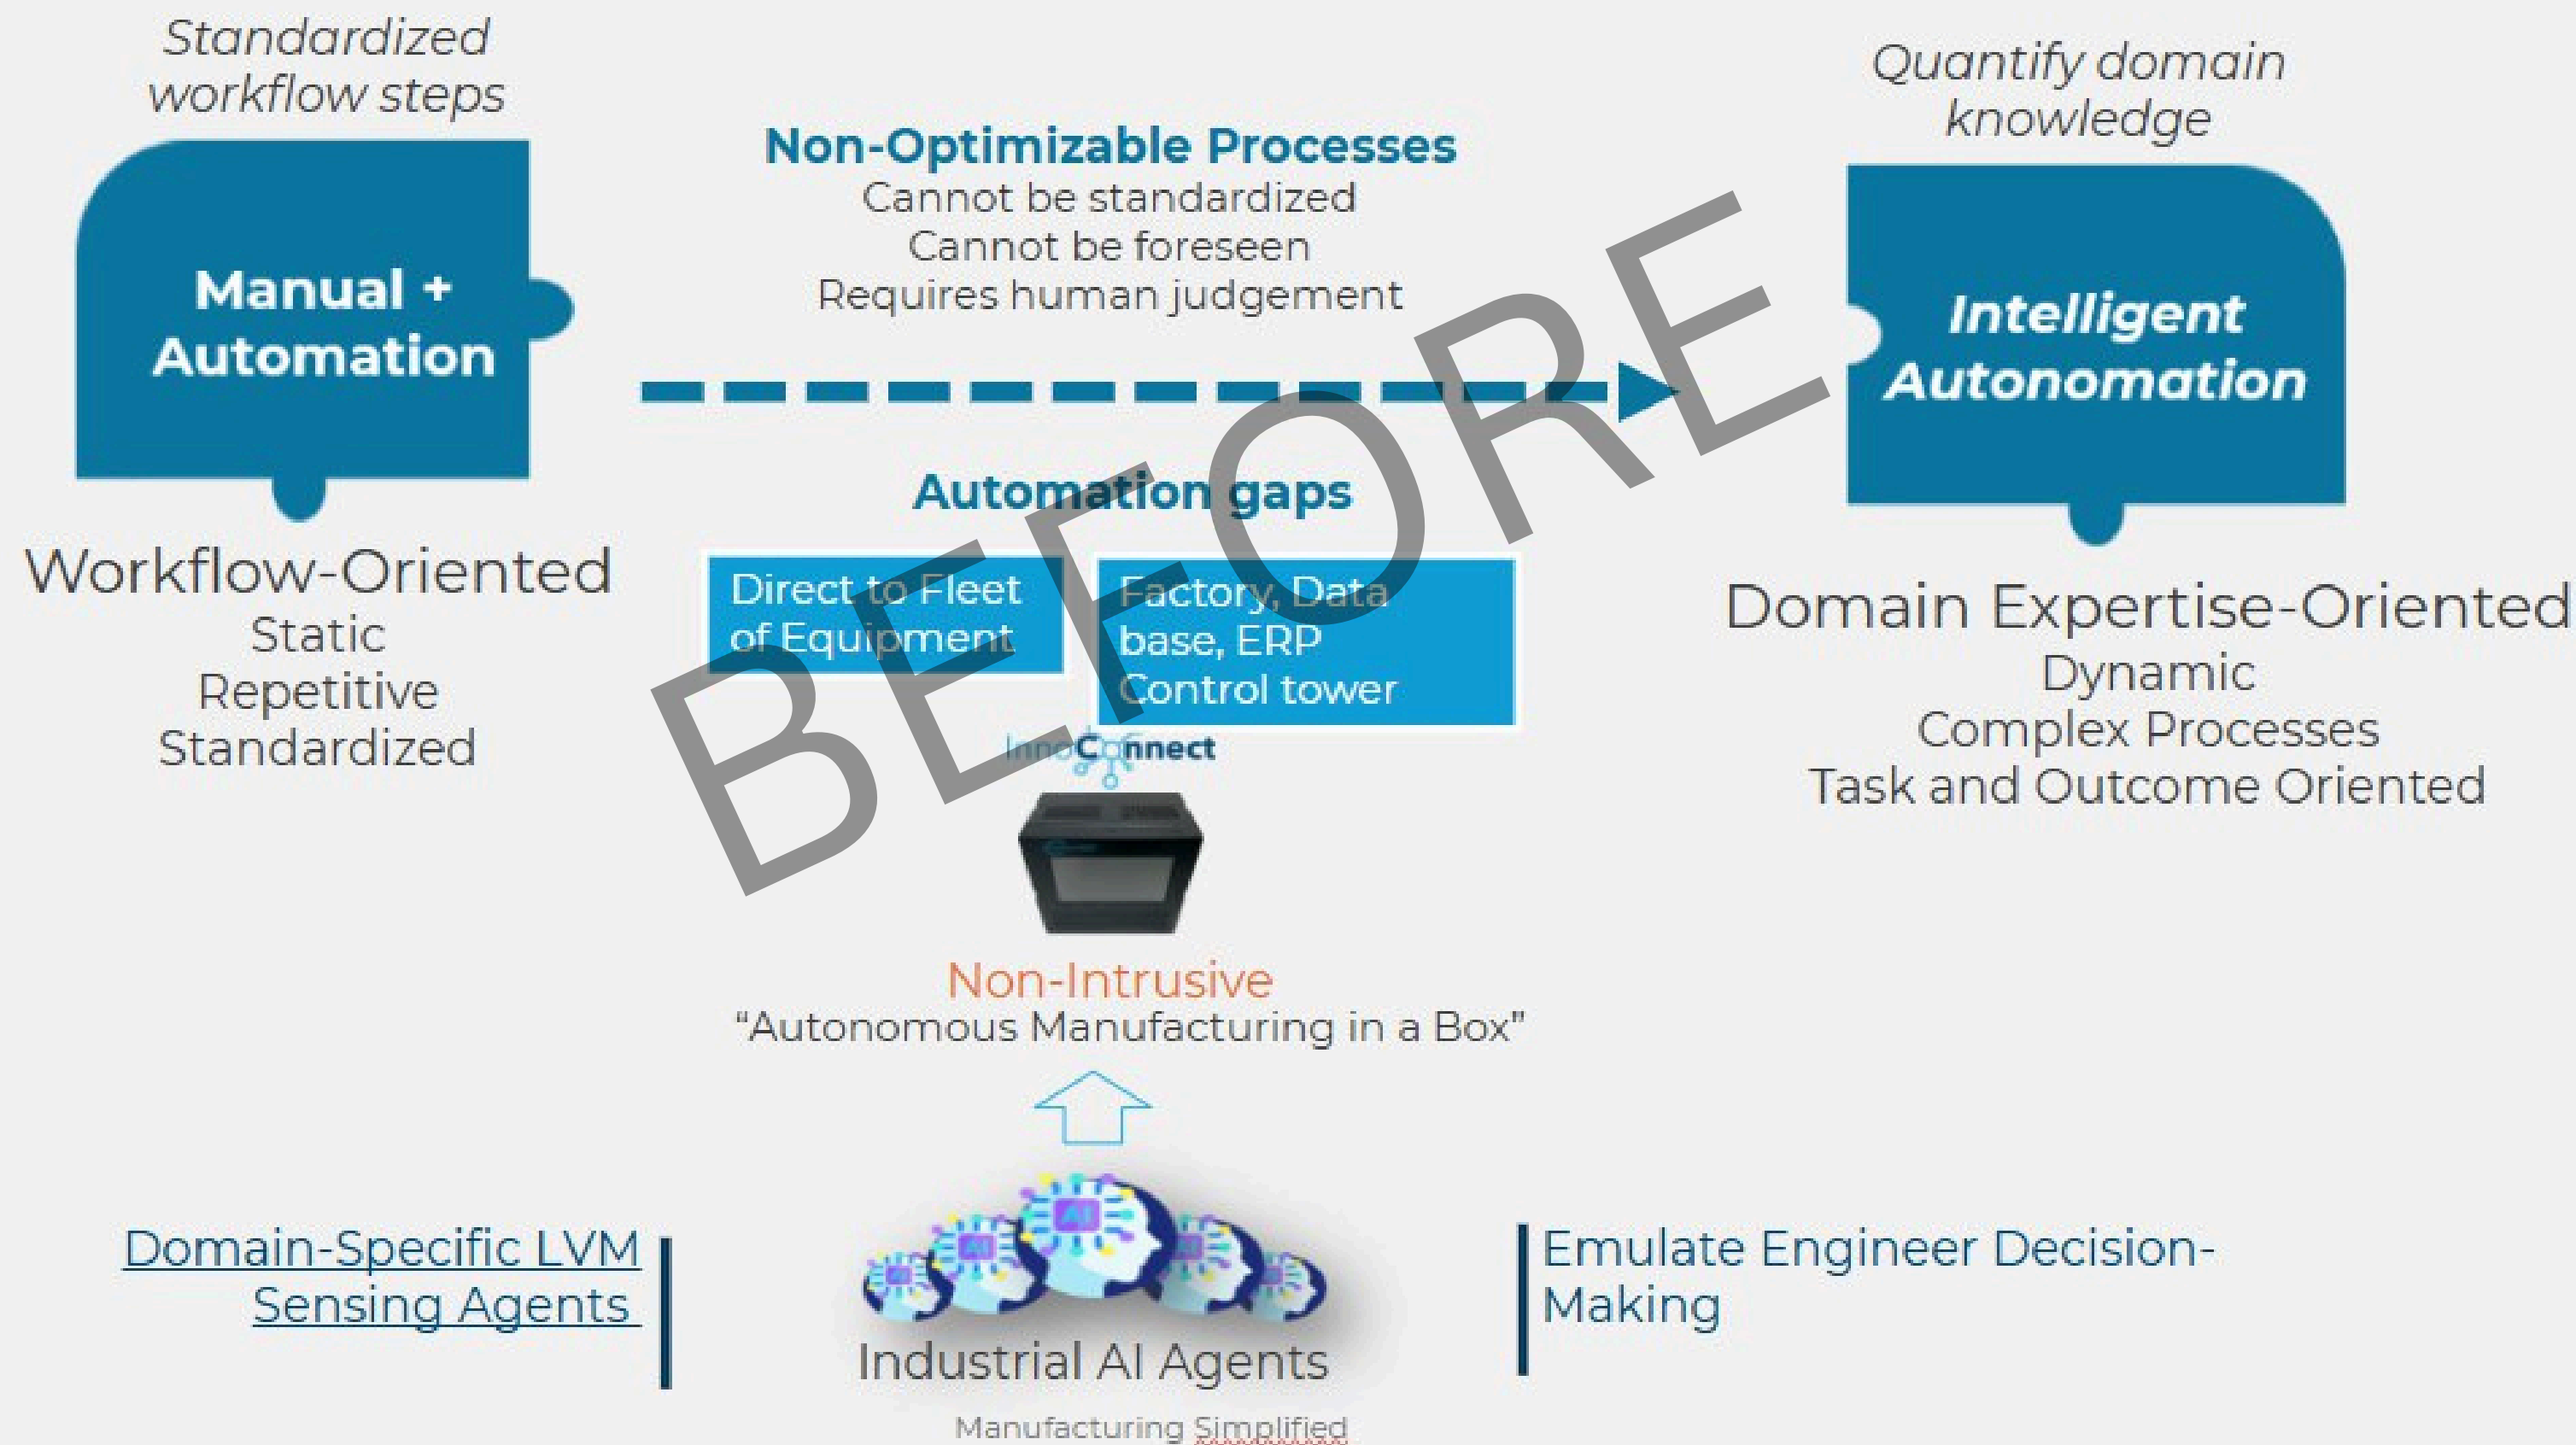

Agentic AI: Shifting the Balance

Fundamentally shifts work — freeing people from repetition,
amplifying innovation, and sustaining enterprise vitality

Disruptive Efficiency Improvements and Zero PPM

INDUSTRY AGENTIC AI FOR FUTURE FACTORY

Constructed by hundreds of Industry proven Blocks and Module of Expert

Generative & Analytic

- Specific **Industry** Trained LLM/LVM,
- **Graphic** data base

Human Machine Interface

- ➔ **Sense Agent:** Perceives environment — images, data adaptively
- ➔ **Think Agent:** Understanding, integrates judgment and prescriptive engines for optimum results
- ➔ **Act Agent:** Orchestrates and executes actions; performs self-healing, optimizations

Underlying Infrastructure

Simulator

Bridge Virtual with Physical operation
100% Transparent and accurate
Explainable and actionable

Generative flow builder

Brain behind Agent and orchestration
From foundation blocks and generated by instruction
Self evolving and enhancing

Orchestration between agents

Dynamic Scenarios & Complex tasks Expands Human Capacity

Collaborate with partners Agent

Ecosystem Agents

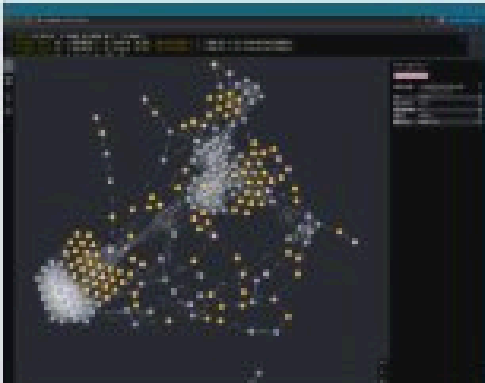

Compliance and cooperates with Other agents
Seamless work with whole factory system

IT/OT Agents

Leverage strong partners Platform
Evolving and complementing to max the value
